IMPORTANT - READ THIS FIRST!

Before assembling model, study sketch carefully.

Important — Apply cement to inside surfaces only. Avoid getting cement on outer surfaces of model sections. Use cement very sparingly and avoid getting cement on hands, so as not to mar or smear plastic surfaces. Do not hurry. Work carefully and patiently.

Important note — Before proceeding to cement parts together, it is advisable to fit parts together dry (without cement) so that you may familiarize yourself with the parts and how they go together, also noting the points where cement is to be applied. For best results assemble model exactly in the order indicated.

This kit is molded of styrene plastic — use only glues and paints appropriate for styrene model kits to assure yourself of a perfect model every time!

THE STORY OF *MARS ATTACKS*

Originally published by **Topps** in 1962, the *Mars Attacks* trading card series was edgy, subversive and darkly comedic. The over-the-top violence and sometimes racy imagery were controversial in its day, shocking parents as much as it entertained kids.

The 55-card set featured a colorful cast of characters, from **Martian troopers** and **Earth soldiers** to **giant mutated insects** and **destructive robots**. *Mars Attacks* told the story of a **Martian invasion of Earth**, from chilling beginning — as Martian troops loaded onto a fleet of flying saucers — to its devastating conclusion: a retaliatory strike on Mars that **obliterated the red planet!**

Since its original publication, *Mars Attacks* has become widely recognized as the **most popular non-sports trading card series in history**. Over the years it has attained cult status as a pop culture staple and an enduring icon of the bygone era of pulp science fiction and horror.

Now, the alien invaders are back for more, as Topps is proud to celebrate **nearly 60 years of *Mars Attacks!***
