

Cool Camo T-birds

ILIAD | 1
DESIGN 48

T-33A of the 57th FIS done up in SEA camouflage, Keflavik Iceland, 1975. This is probably the only USAF T-33 to appear in this scheme.

SEA scheme FS colours are Tan 30219, Medium Green 34102, and Dark Green 34079. Lower surface is Light Grey 36622 International Orange (FS 12197) hi-vis areas on tip-tanks and fin.

57th FIS emblem on left side.

0-80540

Note white outlines

T-22A of the Pakistani Air Force's No. 2 Squadron.

Aircraft is overall greyish-green ca. FS 24097

Hi-viz areas on tip-tanks and fin are red.

White fin top

Note white nose areas.

RCAF CT-133 (Canadair-built T-33) of No. 2 Fighter Wing, Grostenquin France, 1961.

Camouflage colours are Dark Sea Grey and Dark Green with PRU Blue undersurfaces

Snoopy on white-painted fin.

White 42 on left speed brake.

T-33 of the Luftwaffe's AG 51 (Immelman), ca. June 1968.

Camouflage colours are RAL 6014, 7012, and 7001. (FS 34064, 36152 and 36375)

Hi-viz areas on tip-tanks and fuselage band are day-glo orange.

Light grey fin top

Note open gun port on this aircraft

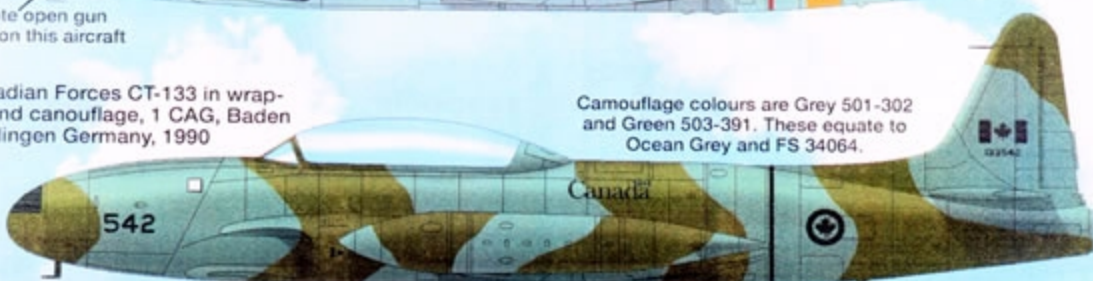

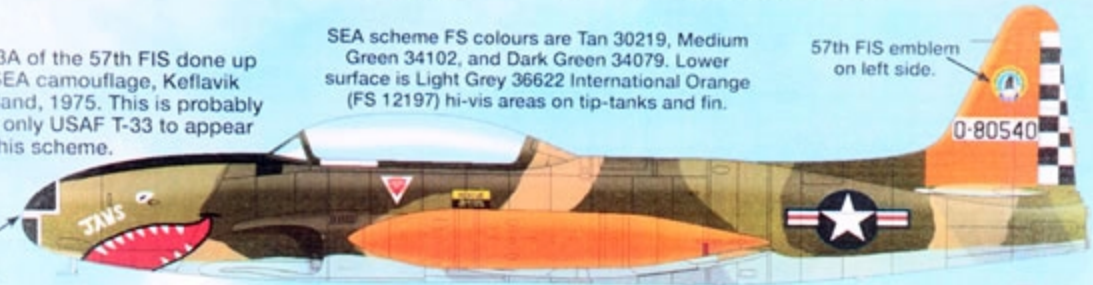

Canadian Forces CT-133 in wrap-around canouffage, 1 CAG, Baden Soellingen Germany, 1990

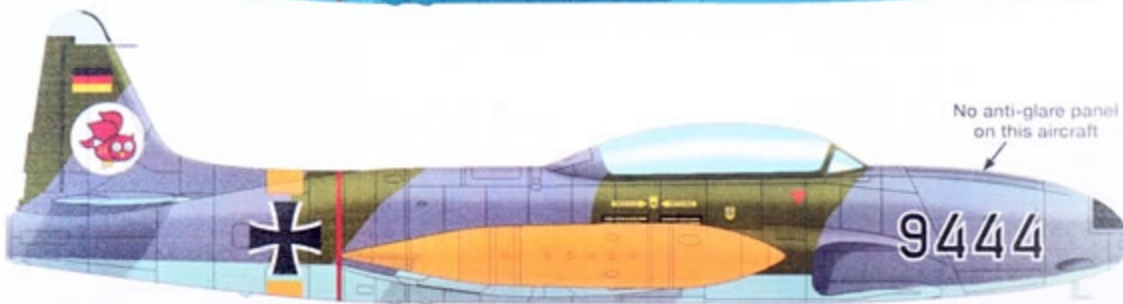

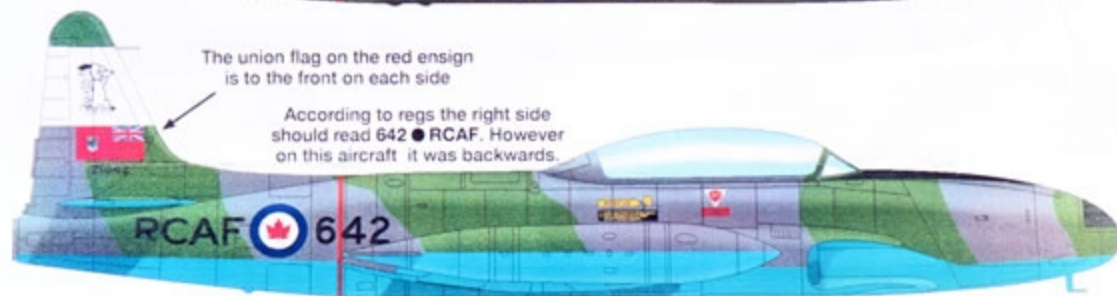

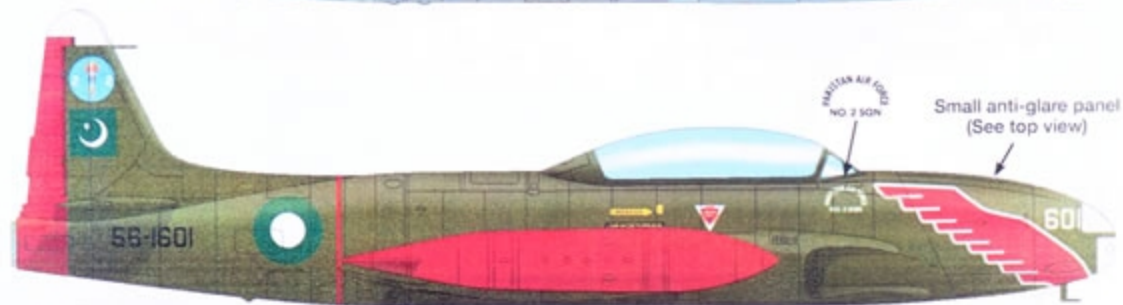

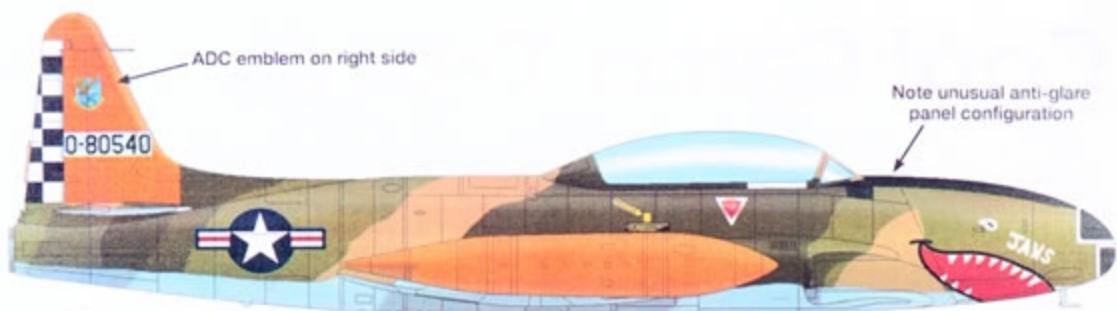

Camouflage colours are Grey 501-302 and Green 503-391. These equate to Ocean Grey and FS 34064.

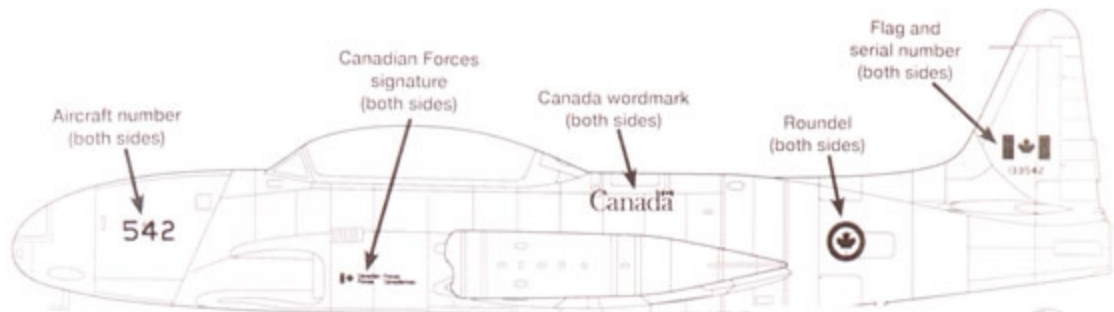

542

Canada

023540

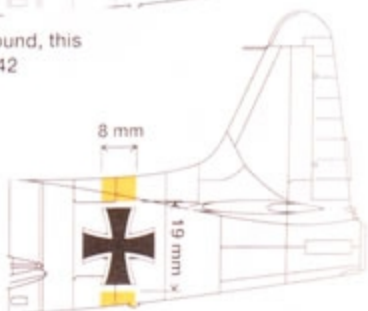

As it can be difficult to see black markings on a camouflaged background, this shows where the various items are to be applied on CAF a/c 542

Typical red "NO STEP" area at wing root leading edge.

Dimensions for masking Day-Glo band around fuselage insignia.

Open gun port, as on Luftwaffe aircraft 9444

Typical blanked-off gun port

Outlet vents as on some CT-133 aircraft, including 133542

Typical application of a/c number on left speed brake.

CAF
133542

Lower surface camouflaged is a mirror image of the top.

No anti-glare panel on this aircraft

542 on top of wing

Roundel below wing

No DON'T WALK markings

Black turbine stripe

Roundel on top of wing

542 below wing
