The Sukhoi Su-25 Frogfoot is one of the latest warplanes in the Soviet air arsenal. It is designed as a close support or ground attack aircraft very similar in concept to the U.S. built A-10 "Warthog". The aggressive shape and heavy armament of the Su-25 make it an interesting and formidable aircraft. It was used extensively in Afghanistan where the mountainous terrain was perfect for testing the Su-25's capabilities.

Your Monogram kit of the Su-25 is fully detailed and includes a full range of armament such as AA-8 air-to-air missiles, UV-16 rocket packs, a large caliber Gatling gun, and AS-7 air-to-surface missiles. A complete cockpit and pilot figure are visible under a two-position clear canopy.
