Supermarine Attacker

The Supermarine Attacker was a British single-seat naval jet fighter built by Supermarine for the Royal Navy Fleet Air Arm (FAA). It was the FAA's first jet fighter. The Attacker developed from a Royal Air Force (RAF) fighter jet project, under Air Ministry Specification E.10 of 1944 (the E for experimental). A single-engine jet fighter powered by the Rolls-Royce RB.41 / Nene. Three variants of the Supermarine Attacker were built for the FAA. Its Attacker F.1, FB.1 and FB.2. All versions armed 4x20mm cannons or 2x1000lb bombs or 12xrockets. Number built was 182.

Plastic parts

Notice!

This kit was made using the short-run technology. Prior to construction the individual parts should be cleaned up on the surfaces destined for cementing and test fitting of the parts before cementing is recommended.
