For serial Nos. Use Letraset or similar

Landing lights paint silver

De-icing Boots Matt Black

Drawing not to scale

DOUGLAS DAKOTA DC-3 (C-47)

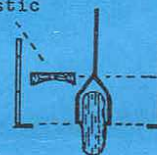

De-icing Boots Matt Black

Before cutting out any parts cut out windows, including the windscreen area.  
Cut out all parts with a sharp modelling knife or scissors allowing half m.m. border around each part.  
Rub down all parts on flat side by using wet & dry pinned to a flat surface until a centreline joint is achieved on all double sided parts.

Assembly:

1. Glue bulkheads into position and cut tailplane slots.
2. Assemble centre wing halves together & cut wing slots.
3. Glue fuselage, wing & tailplane halves together and fasten in place.
4. Sand & fill where required with Milliput or for small joints Ready Mix Polyfiller.
5. Glue cowlings into position & propellers.
6. Drill a small hole (under 1/8") in the top of the fuselage for the Raydome to be housed - use drawing for ref. Position Raydome using PVA white glue.
7. Assemble undercarriage and glue into position using Superglue.
8. Fill windows & windscreen with Kristal Klear.

U/C brace make from scrap plastic

Main undercarriage assembly

# WELSH MODELS
