No 7028

# Sd.Kfz. 162 Jagdpanzer IV Ausf.F

**UK**

The Mark IV self-propelled tank-killer was built on the chassis of the Pz.Kpw. IV, one of the most efficient and widely used German tanks of the Second World War. Characterised by a low profile, the Mark IVs were produced in their hundreds, steadily being improved and fitted with better weaponry such as the long-barrelled 7.5 cm gun that made it a match for any Allied tank.

**F**

Le moyen d'artillerie automoteur antichar modèle IV fut développé sur la caisse du char d'assaut Pz.Kpw. IV, qui était le moyen le plus diffus et le plus efficace utilisé par l'Armée allemande au cours de la deuxième guerre mondiale. Caractérisé par sa forme basse, il fut réalisé dans des centaines d'exemplaires toujours plus perfectionnés et dotés d'un armement toujours plus performant tel que la pièce à canon long, calibre 7.5 CM, qui lui permettait d'affronter avec succès tous les chars d'assaut alliés.

**D**

Il semovente cacciacarri modello IV venne sviluppato sullo scafo del carro armato Pz.Kpw. IV che era il mezzo più diffuso ed efficiente utilizzato dall'Esercito tedesco nel corso della Seconda Guerra mondiale. Caratterizzato da una bassa sagomatura venne realizzato in centinaia di esemplari, via via più perfezionati e dotati di armamento sempre più valido, quali il pezzo a canna lunga in calibro 7.5 CM, che gli permetteva di affrontare con successo ogni carro armato alleato.

**E**

El cazacarro autopropulsado modelo IV fue desarrollado sobre la base del casco del tanque Pz.Kpw.IV, que constituyó el medio más difundido y eficiente utilizado por el ejército alemán durante la Segunda Guerra Mundial. Caracterizado por su baja conformación, se fabricó un centenar de unidades, cada vez más perfeccionadas y dotadas de armamentos siempre más eficaces, como la pieza de cañón largo de calibre 7.5 cm, que le permitió enfrentar exitosamente a todos los tanques aliados.

**NL**

De tankjager model IV met zelfstandige aandrijving werd ontwikkeld op de romp van de Pz.Kpw. IV tank. Dit was het meest voorkomende en efficiënte middel dat door het Duitse leger in de Tweede Wereldoorlog werd gebruikt. Er werden honderden exemplaren van geproduceerd, die werden gekenmerkt door een lage vormgeving. Langzaam aan werden deze tankjagers geforceperioneerd en met steeds betere wapens uitgerust, zoals het stuk met lange loop met een kaliber van 7.5 CM. waardoor hij met succes elke geallieerde tank het hoofd kon bieden.

**ATTENZIONE** - Consigli utili:  
Prima di iniziare il montaggio, assicurarsi che tutte le parti siano pulite e libere da olii e grassi. Rimuovere le parti in eccesso con un panno morbido e pulito. Assicurarsi che le parti siano pulite e libere da olii e grassi. Rimuovere le parti in eccesso con un panno morbido e pulito. Assicurarsi che le parti siano pulite e libere da olii e grassi. For a perfect application of the decals, we suggest using **MODELMASTER** products 2145 or 2146.

Per una perfetta applicazione delle decalci, si consiglia l'uso dei prodotti **MODELMASTER** 2145 oppure 2146.

Für eine perfekte anbringung der decalci wird die verwendung von **MODELMASTER** no. 2145 oder 2146 empfohlen.

Pour une pose parfaite des decalci, nous vous recommandons l'utilisation des produits à decalci **MODELMASTER** réf. 2145 ou 2146.

Voor het perfecte aanbrengen van transfers, adviseren wij gebruik te maken van de **MODELMASTER** producten 2145 of 2146.

Para facilitar la colocación de las calcas y conseguir un resultado perfecto, sugerimos el uso de los productos 2145 o 2146 de **MODELMASTER**.

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie accostando dal foglio, immergerle in un bicchiere di acqua pulita per circa 10", metterle in posizione sul modello e fare scivolare dalla carta; per una migliore aderenza compresionarle con una pezzuola pulita.

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 10"; position the decals on the kit, letting them slide from the paper. For a better adhesion, press them by means of a clean rag.

Påläggning av decalcer. Klipp ut den decal som skall användas och doppa den i ett glas vatten under en 10". Sätt decalen på plats på modellen och låt den sakta glida av pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Anbringung. Die benötigten Abziehbilder vom Blatt abschneiden, in ein Glas reines Wasser für etwa 10" eintauchen, auf das Modell legen und dann vom Papierbogen abgleiten. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem reinen Tuch anpressen.

Instruction pour l'application des decalcomanies. Couper les decalcomanies choisies et les plonger environ 10" dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

Instrucciones Para la aplicación de las decalcomanas: cortar las requeridas; sumergirlas en un recipiente de agua limpia durante 10"; colocar las calcomanas sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapito limpio.

Transfers: knip het benodigde deel uit, dempel dit ca 10" onder water, duik het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.

Transfer: knip het benodigde deel uit, dempel dit ca 10" onder water, duik het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.
