

RM105 00/H0 scale Platform Shelter

Instructions

Carefully extract all components from both sheets. Components are fixed to the sheets by score lines which cut part way through to hold them in place. Marked with BLUE arrows on the printed sheet. Fold card back to locate the scores, then run the point of your knife along the score lines to detach.

Check list. this pack contains:

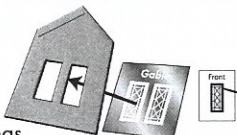

1. x Printed components sheet.
1. x Glazing sheet.
1. x Plain grey card components sheet.
1. x Instructions.

To construct this kit you will need the following:

1. A modellers knife.
2. Scissors.
3. Glue. PVA or UHU All Purpose solvent free.
4. Water colour paints for painting corners etc.

1 Glazing.

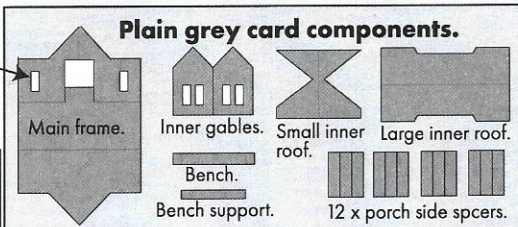

Cut out the four glazing pieces and fit them to the back of the openings in the GREY card gables and main frame.

Painting corners and edges.

This is best done before you build. Fold all corners fully back and paint with VERY much watered down paints to match.

Plain grey card components.

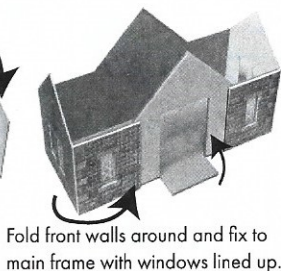

2 Main walls.

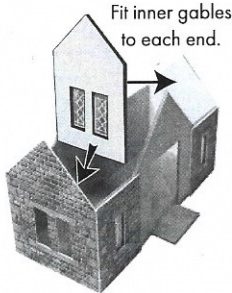

Fix back wall to back of Main Frame.

Side walls fold around.

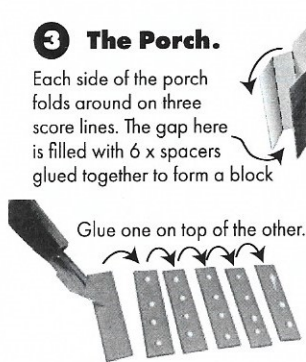

Fold front walls around and fix to main frame with windows lined up.

Fit inner gables to each end.

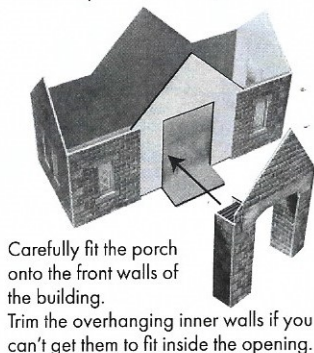

3 The Porch.

Each side of the porch folds around on three score lines. The gap here is filled with 6 x spacers together to form a block

Glue one on top of the other.

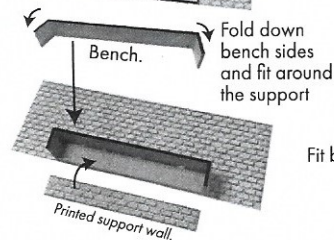

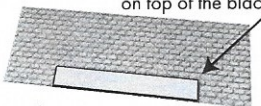

Place to the front wall whilst glue is still wet. Fold sides around and hold with all edges at right angles till set.

Carefully fit the porch onto the front walls of the building. Trim the overhanging inner walls if you can't get them to fit inside the opening.

4 The Interior.

Cut out the inner wall to the right here →
Then glue the grey card bench support
on top of the black strip.

Bench.

Fold down
bench sides
and fit around
the support

Printed support wall.

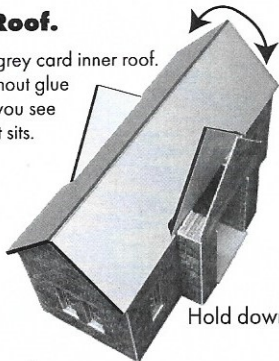

Fit bench top.

Cut out this wall and fit bench support here.

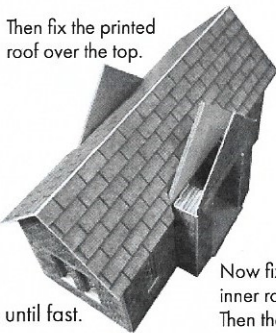

Fit the inner wall inside the building
fixed to the back wall.

5 Roof.

Fix the grey card inner roof.
Test without glue
first so you see
where it sits.

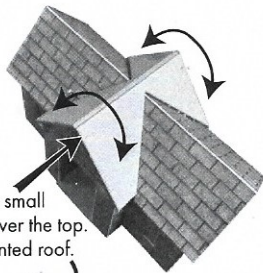

Hold down until fast.

Then fix the printed
roof over the top.

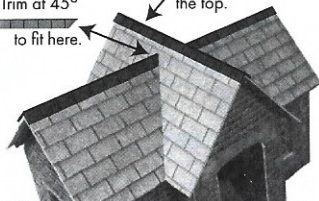

Now fix the small
inner roof over the top.
Then the printed roof.

Fit ridge tile strips.

Trim at 45°
to fit here.

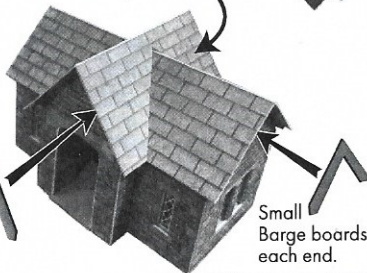

Longest fits
the top.

Fit barge boards.
They fix onto the ends
of the inner roofs and
underneath the
printed roofs.

Large
Barge boards
front and rear.

Small
Barge boards
each end.
