

F-51D MUSTANG with GROUND VEHICLE "KOREAN WAR"

1/72nd SCALE

F-51D MUSTANG

The P-51 Mustang earned its reputation as one of the greatest fighters of the Second World War perhaps of all time. The replacement of the 1,100 hp Allison V-1710-39 engine in the original design to the Rolls-Royce Merlin engine brought the Mustang into the realm of excellence. This single seat fighter plane excelled with its deadly weaponry, high speed and long range maneuverability. This combination made the Mustang unparalleled as an escort fighter, interceptor and ground attacker. In 1947, as the US Air Force (USAF) was separated from the US Army Air Force (USAAF) and became independent, all of the USAF airplanes were renamed with the mew "F-" initial from former "P-" initial so that the P-51D Mustang got the mew name of the F-51D Mustang since then. The F-51D played an active part through the whole period of the Korean War as major air war potential for the UN forces including USAF and ROKAF.

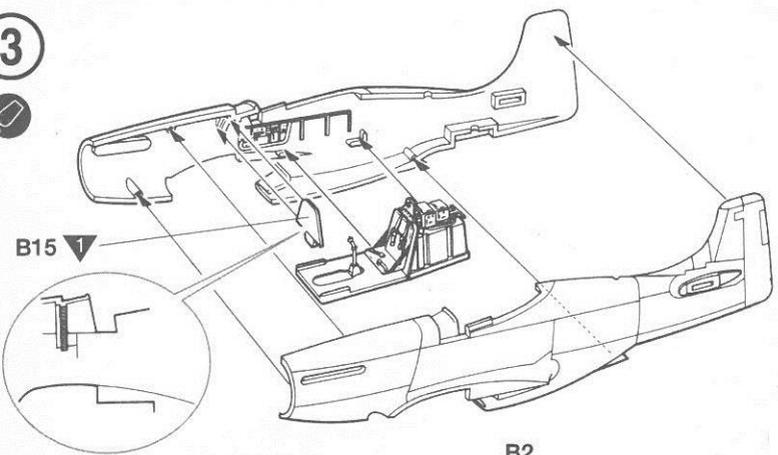

Die P-51 Mustang erwarb sich den Ruf eines der großartigsten Jagdflugzeuge des zweiten Weltkrieges. Nach anfänglichen Schwierigkeiten mit dem originalen 1100 PS Allison V1710-39 Motor rüstete man auf das Rolls-Royce Merlin Triebwerk um. Die daraus resultierenden Ergebnisse übertrafen die Erwartungen um ein Vielfaches. Die Mustang war ein Musterbeispiel für eine perfekte Kombination aus Bewaffnung, Geschwindigkeit und Wendigkeit geworden. Durch die Montage von Zusatztanks wurde sie zum unverzichtbaren Begleitjäger der amerikanischen Bombergeschwader über Deutschland. Als im Jahre 1947 die US Air Force (USAF) aus der US Army Air Force (USAAF) ausgegliedert und eigenständig wurde, ersetzte man bei allen USAF Flugzeugen die früheren P-Kennungen durch F-Kennungen. So wurde aus der P-51 Mustang die F-51 Mustang. Unter dieser Bezeichnung spielte sie eine wichtige Rolle im Koreakrieg (1950-1953) bei der UN-Streitmacht, bestehend aus USAF und ROKAF (Republic of Korea Air Force).

P-51ムスタング戦闘機は、第2次世界大戦の多分あらゆる時期にわたり偉大な戦闘機の中の一機としての評判を得ました。当初の設計時のアリソン社製1,100馬力V-1710-39型エンジンからロールス・ロイス社製のマーリン・エンジンに替えることで、ムスタング戦闘機は優秀戦闘機の範囲に入ったのです。この単座戦闘機は、その強力な武装、高速および長い航続距離を持つ行動性能で優れていました。これらの組み合わせが、ムスタング戦闘機を、護衛戦闘機、迎撃戦闘機および対地上攻撃機をして比類なき戦闘機たらしめたのです。1947年、米空軍(USAF)が米陸軍航空隊(USAAF)から分離され独立した時、米空軍の全ての飛行機は、それ以前の「P-なにに」のイニシャルから「F-なにに」のイニシャルに名称が変更されました。それでP-51Dムスタング戦闘機は、それ以降F-51Dムスタング戦闘機という新名称を得たのです。F-51Dムスタング戦闘機は、米空軍および韓国空軍を含む国連軍の主要な航空戦力として朝鮮戦争の全期間を通じて活躍しました。

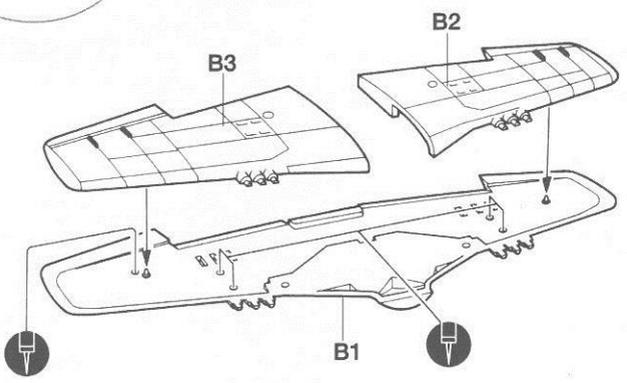

P-51무스탕기는 아마도 제2차 세계대전 전 기간을 통틀어 보아도 가장 뛰어난 활약을 펼쳤던 뛰어난 전투기중의 하나라 해도 틀림없을 것이다. 당초 앨리슨사제의 V-1710-39형 엔진을 장비하고 있던 무스탕의 원형기는 이 엔진이 지닌 고질적인 고고도 성능 부족 문제가 지적됨에 따라 새로이 영국제의 롤스로이스 멀린엔진(후에 패커드 멀린엔진으로 라이센스 생산)을 도입, 장착하게 되는데, 이 개수작업에 의해 잠재된 성능을 100% 발휘할 수 있게 된 무스탕은 비로서 걸작기의 반열에 오르게 된다. 단발엔진의 단좌형 전투기임에도 불구하고 우수한 무장탑재량과 뛰어난 고수성은 및 장거리 항속능력을 지닌 무스탕은 이러한 장점을 최대한 살려 대전 기간 중 호위, 요격 임무는 물론 지상공격기나 적 참기로서도 맹활약을 펼쳤다. 1947년 공군은 육군항공대로부터 분리 독립되어 공군 사용 기체는 모두 이니셜 "P-" 서 "F-" 로 개칭된다. 따라서 P-51D무스탕은 F-51D무스탕이라는 새로운 이름을 가지게 되었다. F-51D는 한국전쟁 기간 중 미공군을 비롯한 한국공군 등 UN군의 중요한 항공전력으로 활약하였다.
