The photo with the inscription "To Berlin" was taken during the Aviadarts-2017 military flight competition, which, according to RIA Novosti, took place from June 14 to 27, 2017 at the Pogonovo training ground. Before the invasion of Ukraine, the inscription was painted over, and camouflage was applied on board, which did not prevent our soldiers from shooting down this "valiant" helicopter along with the Nazi crew.
